Foundation Level (CTFL) Syllabus.

ISTQB syllabus devided into 3 parts

    1. remember

    2. Understand

    3. Apply

Remember testing terminologis, understand it And Apply in practical.

For Example :- if you're testing Something that is related to values then you needs to remember that in testing methodologies there are terms Available for testing the range

    → Equivalence Partition

    → Boundary value.

So here you remember, understand and Apply the Methodology

that's why they devide the Syllabus into 3 Parts.

For ISTQB foundation level Exam you needs to be very clear about the Fundaments of testing.

Lets discuss, How much content we needs to cover According the Exam :-

    A. Testing Fundamental

    B. SDLC

    C. Testing Types

    D. Testing Techniques

    E. Test management

    F. Tools For Testing (JIRA)

Above are the Topics we needs to Focus According the Exam.

Now before Starting Study about istqb we needs learn about the Boards which Provides the certification

There are 28 Exam Provider boards;

Here we only discuss about 2 or 3 Provider

→ Indian Testing Board
  ↳ Exam cost around 5K only.

 → American Software testing qualification Board
   ↳ Exam cost Around $250

 → Association for testing & Quality Assurance
   ↳ Exam cost Around $250

The difference is the American board and AS*SQA Board display your name in the list of US certified testers, sometime few US clients demands for US Certified Testers.
